

**REMARKS**

The above-identified application is United States application serial number 09/721,012 filed on November 21, 2000. Claims 1 through 62 are pending in the application, and are subject to a restriction requirement.

The Examiner requires election of one of the following groups of claims for prosecution in this case:

Group I: Claims 1-17, 18-34, and 50-62, drawn to a mobile information network browser system with adaptive personalization audio feedback capability for retrieving information from an information network, classified in class 704, subclass 275.

Group II: Claims 35-42 and 43-49, drawn to a mobile information network browser device with audio feedback capability, classified in class 709, subclass 104.

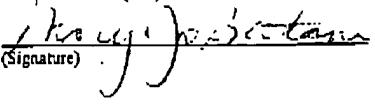

Applicant elects Group I with traverse.

Applicant submits that both devices include similar features and therefore the search and examination of both Groups I and II should not present an undue burden on the examiner.

**CONCLUSION**

Group I has been elected for further prosecution with traverse. Further examination of these claims is requested. The Examiner is invited to telephone the undersigned at (949) 251-0250 if there are any issues raised by this response that may be resolved by telephone.

I hereby certify that this correspondence is being facsimile transmitted to the USPTO at (703) 872-9306 on the date shown below:
